REACTION RATE AND EQUILIBRIUM

DOCUMENT

video « Chemistry: Reaction Rates And Equilibrium ».

It is a short video (2:17) that you can play as many times as you like.

Task: Your teacher asks you to explain to other pupils of your class how we can speed up chemical reactions.

You can use the questions below to organize your presentation but feel free to use them in any order you like.

- Give examples of slow and fast reactions.
- What are the factors affecting chemical reactions?
- What theory explains the effects of these factors on reaction rate? Explain.
